

# IN 'N NEUTEDOP

	WAT?	HOE? / AAN WIE?	VEREISTES / WANNEER	OUDERDOM VAN DIERE	SLICE GROUPS <sup>(3)</sup>	EBV
1	<b>DNA Stoetbulle</b> Trek bulle sterthare (+ wortels)	Unistel Lab. (Kaapstad) Clinomics Lab. (Bloemfontein)	Voor paringseisoen	Geen kalwing word opgeneem sonder DNA van vader nie. Vaderskapbevestiging vir bulle gebore vanaf 01/01/2014 verpligtend.		
2	<b>Paringseisoen</b> Reproduksie: Dae tot Kalwing	Elektronies via: Excelvorm <sup>(1)</sup> of HerdMaster	Bul-in, bul-uit en KI datums na die kalfseisoen. <b>Baie belangrik:</b> Kodes vir koeie wat nie gekalf het nie.	Alle dekbare vroulike diere	360 d	Dae tot Kalwing (DC) Dragtigheidslengte (GL)
3	<b>Geboorte-kennisgewing</b> Meld alle kalwers aan: Stoet, kommersieel, doeie kalwers en aborsies bo 7 maande Geboortegewig	Excelvorm Web Registrasies <sup>(2)</sup> HerdMaster	Binne 120 dae (4 maande) na geboorte van kalf om laatfooi te vermy	Voltooi alle geboortekodes. Sertifikate word na opname onder <u>Lede Verslae</u> op web geplaas. Kontak kantoor vir wagwoord en handleiding.		
				Binne 24 uur na kalwing	45 d	Geboortegewig
4	<b>Speen</b> 200 Dae gewig Melk Volwasse Koeigewig Kondisietelling & heuphoogte Skede / Naelvel Temperament	Excelvorm of HerdMaster	Speengewig (200 dae) <b>Verpligtend</b>	80 tot 300 dae	45 d	200 Dae Gewig
			Weeg koeie met speen van kalwers	80 tot 300 dae	45 d	Melk
			Punt kondisie (1 - 9) en meet heuphoogte (kruishoogte)	Met speen van kalf		Volwasse koeigewig
			Kode: 1 (hangend) tot 9 (skoon)			Wanneer genoeg data beskikbaar is
			Kode: 1 (mak) tot 5 (aggressief)	60 tot 400 dae	45 d	Wanneer genoeg data beskikbaar is
5	<b>Jaaroud</b> 400 Dae gewig Reproduksie (Skrotum) Karkas (Skandering) Veldikte (Skandering)	Excelvorm of HerdMaster	Gewig met Skrotum omvang (cm)	300 tot 500 dae	60 d	400 Dae Gewig
				300 tot 700 dae	60 d	Skrotum
		Kontak die Kantoor	Geakrediteerde skandeerder + gewig	300 tot 800 dae	60 d	Karkas
						Wanneer genoeg data beskikbaar is
6	<b>18 Maande</b> 600 Dae gewig	Excelvorm of HerdMaster	Gewig	500 tot 900 dae	60 d	600 Dae Gewig
7	<b>Kansellasies</b> Diere dood, uitgeskot of verkoop as kommersieel	E-pos, Excelvorm of HerdMaster	Deur die loop van die jaar	Heffingslyste (kuddelyste) word elke November uitgestuur vir die jaarlikse Heffings. U word Februarie gefaktureer op alle aktiewe diere u heffingslys. Maak asb seker dat die heffingslys op datum is om onnodige fooie te vermy.		
8	<b>Oordragte</b>	Stuur 'n oordraginstruksie met die oordragdatum, volledige posadres, kontaknommer en e-posadres van die koper per Vendurol, E-pos of Faks.				
9	<b>Inspeksies</b>	Elke Teler ontvang 'n jaarlikse keurbesoek en word vooraf deur Tegniese Adviseur gekontak. Sertifikate beskikbaar op web onder <u>Lede Verslae</u> na opname van inspeksies. Vroulike diere >12 maande en bulle >18 maande kan aangebied word vir keuring.				

(1) Excel vorms beskikbaar op die web onder Vorms en Dokumente (2) Kontak kantoor vir instruksies (3) Diere gebore in hierdie tydperk word saam ontleed.

- Weeg / Meet / Punt altyd in groot groepe - eerder meer diere minder gereeld as andersom. Weeg / meet / punt altyd voordat diere geskei word met speen / kastreer / uitskot.
- Maklikste weegprogram is vergesel met 'n kort kalfseisoen. Indien nie, gebruik die 2x per jaar weeg / meet / program waar alle diere tussen 4 tot 23 maande ses-maandeliks geweeg word (kalwers nie gespeen moet duidelik gemerk word).
- Merk alle diere wat anders behandel is (siek, skou, veiling ens.) 'n 1 - 3 letters bestuursgroep van u eie keuse (bv. SK vir siek) - hierdie is BAIE belangrik.
- Weeg ALLE diere nog op die plaas insluitend uitskot en kommersiële diere OF moet glad nie weeg nie. Selektiewe weging gee verkeerde EBVs.

'n volledige Stergradering  
aan u Kudde te verseker**

## IN A NUTSHELL

	WHAT?	HOW? / TO WHOM?	REQUIREMENTS / WHEN	AGE RANGE OF ANIMALS	SLICE GROUPS <sup>(3)</sup>	EBV	
1	<b>DNA Stud Sires</b>	Pull bulls' tail hair (+ roots)	Unistel Lab. (Cape Town) / Clinomics Lab. (Bloemfontein)	Before Mating Season	No calvings will be recorded without DNA on record for the sire. Sire verification for bulls born from 01/01/2014 compulsory.		
2	<b>Mating Season</b>	Reproduction: Days to Calving	Electronic via: Excel form or HerdMaster	Bull-in, bull-out and AI dates after the calving season. <b>Very important:</b> Codes for cows that didn't calve.	All servicable females	360 d Days to Calving (DC) Gestation Length (GL)	
3	<b>Birth Notification (BN)</b>	Birth notify all calves: Stud, commercial, dead calves and abortions over 7 months	Excel form Web Registrations <sup>(2)</sup> HerdMaster	Within 120 days (4 months) after birth of calf to avoid late fees	Complete all birth codes. Certificates are loaded on the web under Member Reports. Contact the Society for your password and a manual.		
		Birth weight			Within 24 h after calving	45 d	Birth weight
4	<b>Wean</b>	200 Day weight	Excel form or HerdMaster	Wean weight (200day) <b>Compulsory</b>	80 to 300 days	45 d	200 Day weight
		Milk			80 to 300 days	45 d	Milk
		Mature Cow weight		Weigh dam at wean of calves	Weaning of calves		Mature Cow Weight
		Body Condition score & Hip Height (Rump Height)		Score body condition (1 - 9) and measure hip height (rump height) in cm			When enough data is collected
		Sheath / Naval		Code: 1 (pendulous) to 9 (clean)	60 to 400 days	45 d	When enough data is collected
		Docility (temperament)		Code: 1 (docile) to 5 (aggressive)			
5	<b>Yearling</b>	400 Day weight	Excel form or HerdMaster	Weight and scrotal circumference (cm)	300 to 500 days	60 d	400 Day weight
		Reproduction (Scrotum)			300 to 700 days	60 d	Scrotum
		Carcase (Scanning)	Contact the office	Accredited Scanner and weight	300 to 800 days	60 d	Carcase
		Hide thickness (Scanning)					When enough is data collected
6	<b>18 Months</b>	600 Day weight	Excel form or HerdMaster	Weight	500 to 900 days	60 d	600 Day weight
7	<b>Cancellations</b>	Animals died, culled or sold as commercial	E-mail, Excel form or HerdMaster	Throughout the year	Levy Lists (herd lists) are circulated annually in November for the Annual Levies. Breeders are invoiced in February for all active animals on their levy list. Please ensure that your levy list is up to date to avoid unnecessary fees.		
8	<b>Transfers</b>	Submit a transfer instruction with the transfer date, complete postal address, contact number and e-mail address of the buyer, via e-mail, sale roll or fax.					
9	<b>Inspections</b>	Each Breeder receives an annual inspection visit and is contacted beforehand by the Technical Advisor. Certificates are available on the web under <u>Member Reports</u> , once the inspections have been loaded onto the system. Female animals >12 months and bulls >18 months can be presented for inspection.					

(1) Excel forms are available on the web under Forms and Documents (2) Contact the Society for instructions (3) Animals born within this period are analysed together.

- Weigh / measure / score always in large groups – rather more animals less frequently than the other way around. Always weigh / point / score before separation occurs (weaning / castrate / culls).
- Easiest weighing program is accompanied by a short calving season. If not use the 2x per year weighing / measuring program where all the animals on the farm between 4 to 23 months old are weighed six months apart (unweaned calves must be pointed out).
- Mark animals that were treated differently (ill, show, auction) with a Management code of 1-3 characters of your own choice (eg. SH for Show) on the list – this is EXTREMELY important.
- Weigh all animals still on the farm including culls or don't weigh at all. Selective weighing gives you incorrect EBVs.
